

Secure Your Future

UNLOCK HIGH-DEMAND CAREER IN ETHICAL HACKING & CYBER SECURITY

Corporate **#Skill-based,**
#Employability-focused & **#Job-**
guaranteed training programs

Why CyberSecurity is a Good Career Option ?

By 2023, more than 1 million cybersecurity jobs were available, but fewer than 400,000 cybersecurity professionals were trained by then. Cybersecurity is an ever-evolving industry. It grew by 11% in 2023 and is **projected to grow by 20% more by 2025.**

Some prominent Cyber Security Job Roles and Salaries in India:

No	Job Role	Approx Salary
1	Chief Information Security Officer (CISO)	INR 38 L-INR 1 Cr
2	Security Consultant	INR 7 L – INR 16 L
3	Security Analyst	INR 5 L- INR 12 L
4	Security Engineer	INR 6 L- INR 11 L
5	Ethical Hacker	INR 5 L- INR 12 L
6	Forensic Analyst	INR 3 L – INR 13 L
7	Penetration Tester	INR 4 L – INR 11 L

Top Companies That Hire for Cyber Security Roles:

About CyberPedia

Leading provider: Cutting-edge cybersecurity and ethical hacking training

Mission: Creating a safe digital world by equipping individuals with cyber threat defense skills

Expert instructors: Certified Industry Experts with real-world experience - as a trainer

Practical learning: Hands-on training beyond just theory on our live corporate projects

Wide range of courses: From beginner basics to advanced level skill-based and job-oriented courses

Structured learning: Step-by-step approach for easy comprehension of complex concepts

Why CyberPedia ?

- **Get training from Corporate Security Researchers!**
- **Go beyond theories and outdated knowledge**
- **Additional employment counseling post-training**
- **Real-time internship on our live corporate projects + Security research**
- **100 % Placement Support**

Our Courses

Skilled Based Courses :

No	Course	What you'll get	Duration
1	Master Program	<ul style="list-style-type: none"> • Basic of networking • Understanding Cyber security • Network Hacking • Advance Attacks on Web application • Hands on experience of API Security • Mobile Application security (Android & iOS) • Learn from Industries expert • placement assistance 	9 Month
2	Grade 1	<ul style="list-style-type: none"> • Web App Security • Network Security • Pivoting & Metasploit Exploitation • Hunting on live Application • Bug Hunting Overview 	4 Month
3	Grade 2	<ul style="list-style-type: none"> • API Security • Lab setup & Automation Tools • Android & iOS Pentesting • Bypassing security restrictions 	4 Month

Online Certification Course (Weekend)

No	Course	What you'll get	Duration
1	Bug Bounty Specialist	<ul style="list-style-type: none"> • Basic of VAPT • OWASP 10 Vulnerability of WebApp • Advance Vulnerability Explanation • Hunting on live Application • Reporting 	2 Month

Our Courses

Job Guaranteed Courses :

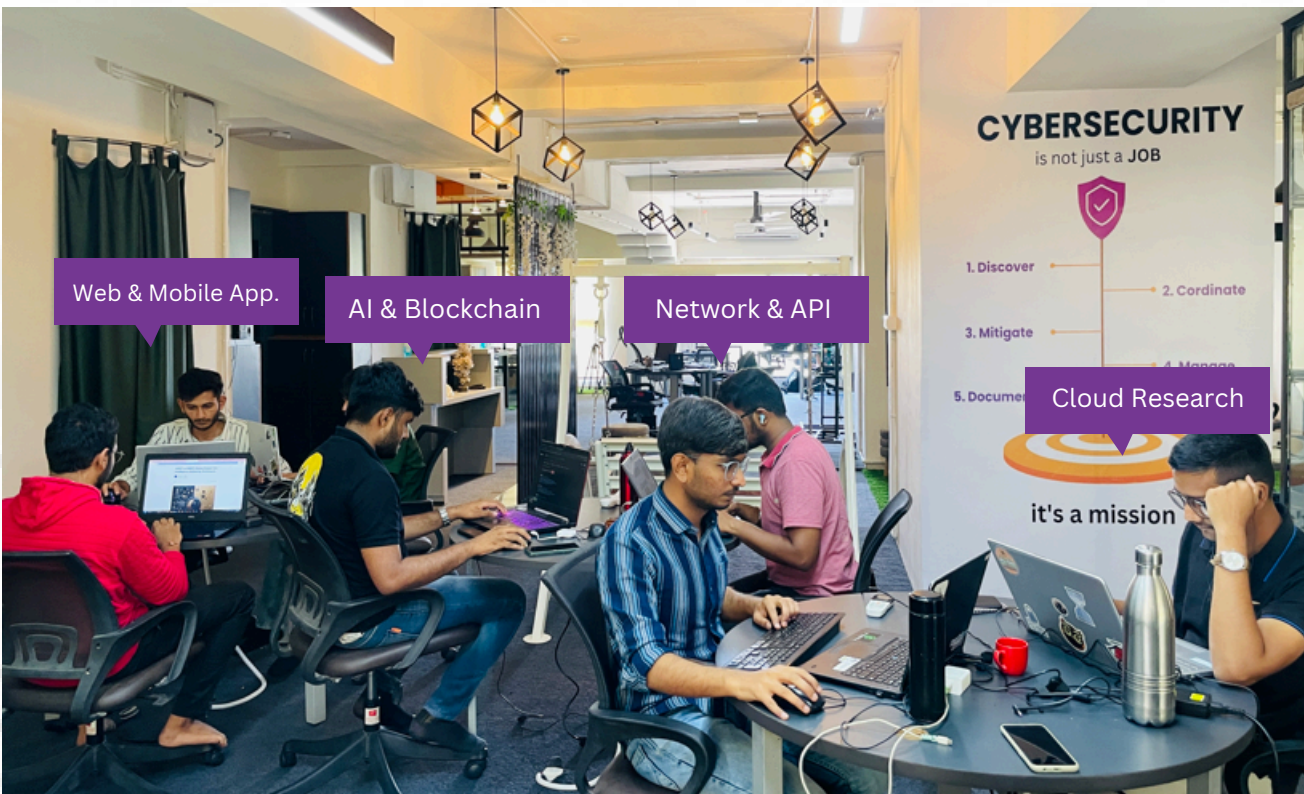

No	Course	What you'll get	Duration
1	Cyber Security Analyst - Offense	<ul style="list-style-type: none"> • Networking • Security Fundamentals • Cryptography • Vulnerability Assessment • Penetrating Mobile, Web, Network Application • Attacking and securing Data and Databases • Post Exploitation, Pivoting and persistence • Mitigation and Vulnerability management • Hardening • AI for Ethical Hacking • AI Pentesting • Web3 and Blockchain Attacks • Reporting 	6 Month
2	VAPT Consultant	<ul style="list-style-type: none"> • Operating System • Networking • Security Basics • Passive Active Reconnaissance • Vulnerability Assessment • Wired Wireless Attacks • Network Attacks • Application Attacks [Web, Mobile, Network] • Application Vulnerabilities [Web, Mobile, Network] • Cloud Attacks • Mobile device attacks • Post exploitation • Pivoting and Privilege escalation • Detection Avoidance • Scripting Basics • AI for Ethical Hacking • AI Pentesting • Web3 and Blockchain Attacks • Reporting 	6 Month

No	Course	What you'll get	Duration
3	Offensive Security Analyst	<ul style="list-style-type: none"> • Operating System and OS Internals • Networking Networking Configuration • Security • Active Directory Basics • Python Scripting Basics • Reconnaissance • Exploitation (Web, Mobile, Network) • Post Exploitation • EDR Evasion and Bypass • Attacking Active Directory • Post exploitation and Pivoting • Covering Tracks • AI for Ethical Hacking • AI Pentesting • Web3 and Blockchain Attacks • Reporting 	6 Month
4	Network Security Analyst Engineer	<ul style="list-style-type: none"> • Operating System • Networking Basics • Networking Configuration • Network Security Assessment Basics Tools • Network and Web Vulnerabilities and Adversaries • Internet Network Discovery • Common Network Service Assessment • Assessing Windows, Linux, Mail Service • Exploiting VPN, Mail, TLS Services • Web Application Architecture • Web Server Assessment • Web server framework and assessment • Data storage assessment and exploitation • Post Exploitation • Pivoting and Persistence • Reporting 	6 Month
